

ALLIED HEALTH EDUCATION STUDENT PRACTICUM

Overview of Requirements for Medical Assistant, Phlebotomy and Pharmacy Technician Programs

Practicum Experiences

Practicum experiences are at local medical facilities, which may involve travel to various regions of Skagit, Whatcom, Snohomish, and Island counties. All students accepted into a practicum must have reliable transportation. All experiences will be under the supervision of personnel at the medical facilities. Students will not be allowed to choose their practicum site. The department chair selects the medical facilities used for practicum sites and places qualified students. Each student is evaluated for practicum readiness according to the Allied Health Student Handbook guidelines (Student Evaluation section).

Placement

In order to be placed in the required unpaid practicum experience, Medical Assistant, Pharmacy Technician, and Phlebotomy student candidates must complete all required courses with “C” grades or better. Student candidates must have the permission/endorsement of the department chair before placement in a practicum experience. In addition, students must

- Have a current Health Care Provider First Aid Card and CPR Card
- Have completed 7-hour WA State AIDS Prevention Training
- Present evidence of a current, negative TB test
- Complete all required immunizations
- No other courses (other than ENGL 170 or SOSC 113) may be taken by students during practicum unless approved by the department chair.

Students must notify the AHE Department chair of his/her intention to participate in a practicum no later than the third week of the quarter prior to the practicum quarter (or other designated date) in order to be placed. This must be done the quarter prior to participating in practicum.

Remuneration: these are unpaid practicum experiences. Students are not to receive payment during their practicum experience.

Insurance Coverage

Medical Assistant, Phlebotomy and Pharmacy Technician students must present evidence of having current private health insurance and professional liability insurance. Professional Liability insurance is purchased when you register for the practicum course. Insurance coverage fees are the responsibility of the student.

Immunizations

Medical facilities require immunizations for all personnel who interface with patients. Immunizations must be completed before registering for certain courses or applying for a practicum experience. The following are required for the practicum experience: *(Pharmacy students are exempt from the immunization requirement)*

- Negative TB test or chest X-ray *(1 every 12 months)*
- Tdap vaccine *(within last 10 years)*
- 2 MMR (measles/mumps/rubella) vaccinations or positive titer
- Hepatitis B vaccination *(series of 3 immunizations)*

Students are required to have received at least the first 2 injections of the Hepatitis B vaccination series before enrolling in courses where there is exposure to bodily fluids or any invasive procedure that is part of the curriculum.

Additional immunizations may be required if recommended by instructor or required by clinical placement:

- Flu Vaccine
- Varicella

Criminal Background Check and Drug Screen

Students must pass a multi-state, multi-zip code criminal background check as well as a drug/illegal substance screening. This requirement is based on medical industry standards and Washington State laws protecting vulnerable populations (RCW 43.43.880 and 43.43.842). Drug screens and background checks are required by clinical agencies where students complete their practicum experience. Students should be aware that certain gross misdemeanors and felonies may disqualify them from participating in practicums and unable to complete their certificate or degree program. Future employment opportunities in the health care field may also be affected. Students will complete the background check and drug screening process when enrolled in AHE 100 (AHE 130 for Pharmacy students). Students who are unable to pass these screenings will be removed from the program.

Written Assignments:

You will be required to write a mid-term and self-evaluation and a final evaluation at the end of your practicum experience. Forms for these evaluations are found in your course syllabus. Also, members of the clinic staff, the clinical preceptor, and the faculty supervisor will write evaluations.

Dress Code:

- Men and women are required to wear their scrubs. The color of the required uniform is determined by the individual program.
- Pharmacy Technician students may wear short lab coats.
- Your school name pin is required to be worn in the clinics on the upper left side of your uniform.
- Clean, new, leather white, navy or black walking/uniform shoes are acceptable but must be approved by the instructor. No cloth shoes of any kind or sandals are permitted. Shoes must be completely enclosed on all sides.
- Collar length hair is to be worn up and fastened. Hair color and style must be professional with no unnatural hair colors (i.e., orange, green).
- Beards must be neat and well groomed.
- No jewelry is to be worn when in uniform with the exception of a watch and wedding ring. If you have pierced ears, no more than one earring in each ear, (only small stud earrings are acceptable).
- Nails must be short and trimmed. No artificial nails may be worn while the student is enrolled in any AHE pathway that contains a practicum.
- No perfumes, colognes, scented deodorants, scented lotions, or strongly scented soaps may be worn. These products can cause a health hazard to persons with respiratory conditions.
- Students will have no visible body jewelry, face piercings, or tattoos at clinical sites. Tattoos must be covered at all times.

Documents on File

The department chair/program assistant will check to be sure the following are on file:

- Required immunizations
- Satisfactory completion of Criminal Background check
- Satisfactory completion of Drug Screening (urine analysis)
- Current CPR and Healthcare Provider First Aid Card
- AIDS Prevention Training Certificate of Completion
- Copy of documentation of **Private** Medical Insurance
- Professional Liability Insurance
- Unofficial copy of transcript
- Student information form

Pharmacy Assistant Licensure Required

Pharmacy students must apply to the Washington State Department of Health – Board of Pharmacy to obtain licensure as a Pharmacy Assistant before entering into clinical work experience. This process includes a criminal background check.

Practicum Pathway Progression

The administrative and clinical components of the program should be taken in the sequence listed; otherwise, availability of courses may not be possible. All required courses must be complete prior to registering for practicum which occurs at the end of the program. If coursework is not complete, or if a grade less than a "C" has been attained in any of the required courses, the student will not be allowed to start practicum. All additional requirements, such as immunizations, must also be completed.
