

Multimedia & Interactive Technology

Planning Guide 2019-2020

Program Overview

Multimedia & Interactive Technology is a two-year program that leads to an associate in applied science degree. A wide array of interactive media products and services are in high demand. The MIT program prepares students to meet this demand by offering training in web design, graphic arts, digital photography/videography, social media, and game and app development. The MIT program offers a Web Designer degree; a one-year Web Design certificate; a Graphic Arts certificate; an Adobe certificate; a Game, App & Web Development certificate; a Digital Media Marketing certificate; and a Digital Video certificate. The Web Designer AAS degree and all but one of the certificates are available entirely online.

Sample Career Options Include:

Workforce

If you are interested in working in the field of Multimedia, our Workforce Planning Guide is designed to provide you with recommended courses to complete your [Multimedia & Interactive Technology, AAS](#) degree. Of course, educational plans may vary, based on which quarter you begin, how many credits are taken, and placement into Math and English. To keep you on the best pathway, we encourage you to consult with an Academic Advisor for scheduling options.

Degree Map

Degree Maps are an integral part of our Planning Guide. Each Degree Map includes a suggested quarterly sequence of courses so you could earn your degree within two years of full-time study. Your Degree Map is also designed to help you create an individualized, customized Educational Plan, which is required of all SVC students. To start creating your Educational Plan, please consult with an Academic Advisor.
